

# Jason Piecora

## Chief Technology Officer

As a CIO/CTO, Jason looks to bridge the gap between technology and business to improve processes and outcomes, drive performance, and exceed customer expectations. With a continued focus on the end users, he employs forward-thinking approaches to uncover further goals and operational improvement opportunities.

Jason's early career spans successes as a software engineer, systems administrator, database administrator, software engineering management, and the past 15+ years in executive leadership roles. He has an affinity for process improvement and established himself as a thought-leader and change agent. Jason has been a part of two Unicorns and is excited to make this his third!

As a servant-leader, he is hands-on, challenging, and present. He pushes his teams to achieve more and deliver innovations that can be felt at all levels of the organization. As he progresses in the technology realm, he is committed to continuing to think outside the box and deliver beyond expectation. He will challenge his teams and continue to positively impact the organizations he is apart of.
